Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

1. INTRODUCTION

This manual covers the functionality and steps to be followed for capturing the **ANNUAL TARIFF PARAMETERS** as applicable to the “Old Tariff Calculation Model”, required for **Permanent Fleet Monthly Tariffs**, for **Pool and VIP vehicles’ Daily Tariffs** and their associated **Kilometre Tariffs**.

Please note that this **Excludes Lease type vehicle tariffs and tariff parameters as a whole.*

2. BACKGROUND

The tariff parameter information needs to be updated annually before the start of each new financial year to ensure any newly purchased vehicles which will be utilised on the VIP or Pool, or old Permanent Hire types, can have tariffs assigned to them.

Upon such tariff assignment to a vehicle by matching the vehicle year model to the tariff year, the Monthly and Daily Tariffs calculated and assigned to it at that point in time, will stay fixed to the vehicle for the life span as defined under the class code parameters the vehicle resorts under / is linked to.

In other words, if a new 2017 year model vehicle is assigned against class code 111 (CAR 1251-1550), with Months Life=48 and Odometer Life=100000, the calculator will calculate and assign the 2017 tariffs to the vehicle taking into account that the number of serviceable months are defined as 48 months while the serviceable kilometres are 100,000 km, further taking into account the vehicle Purchase Price, the Depreciation Percentage, Appreciation Percentage and Replacement Cost as defined for the class.

The monthly and daily rate being the Fixed Costs Component of the calculated tariff will therefore be fixed for a period of 48 months. The Maintenance Value kilometre component forms part of the Variable Costs Component of the vehicle tariff and can be adjusted annually to cover inflation related variable cost increases such as Servicing Labour and Parts Price increases, etc. (all forming part of the Maintenance Values defined and linked to the various Class Codes).

3. RESPONSIBLE DIVISION / USERS

All tariffs and tariff related information management relates to the financials of g-Fleet, hence the responsibility for managing such data resides within the **g-Fleet Finance Section**.

The responsible capturer user should ideally be someone familiar with the organisation's overhead expenditure, the financial costs and invoicing of g-Fleet vehicles; someone with an understanding of the various rental business models and tariffs applicable within g-Fleet and with good knowledge of the various vehicles, makes and models in the industry, their

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

maintenance related costs, configurations and fuel types, e.g. petrol vs diesel and how the costs differ between these types of vehicles.

The approver user should most probably be the responsible overseeing Finance Section Manager who has the authority and knowledge to oversee the captured tariff parameter and overhead data including maintenance values and approve the parameters and cost items for each year.

4. USER ACCESS REQUIREMENTS

There are two levels of access applicable to this FIS module, in line with auditor requirements and also because of the importance and financial impact it has on the billing of vehicles in the system.

Level 1 – Capturer Level (can capture and edit captured parameter data but cannot approve)

Level 2 – Approver Level (can view, edit, modify and approve captured tariff parameter data)

5. MENU NAVIGATION

Click on **Finance** under the main FIS menu and then select:

6) Annual Tariff Parameters

a) Tariff Parameter Management (Includes Maintenance Values)

6. FUNCTIONALITY

6.1 Selecting the Tariff Parameter Year

The Tariff Parameter Year is the Financial / Fiscal Year for which the General Tariff Parameters and Overhead Cost Items (fixed and variable) including Maintenance Values are to be defined.

Tariff Parameter Year:

-- Please Select Fiscal Year --	▼	Select
-- Please Select Fiscal Year --		
2008 - Approved (2009-06-04)		
2009 - Approved (2009-06-04)		
2010 - Approved (2013-10-31)		
2011 - Approved (2013-10-31)		
2012 - Approved (2013-10-31)		
2013 - Approved (2013-10-31)		
2014 - Approved (2016-06-29)		
2015 - Approved (2016-06-29)		
2016 - Pending		
2017 - Pending		
2018 - Pending		

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

When selecting a previously approved tariff parameter fiscal year as per 2015 example below, the following is displayed:

Tariff Parameter Year: 2015 - Approved (2016-06-29)

Tariff Parameters & Overhead Values

Parameters & Overhead Values	Values for 2014	Values for 2015	
Description	Amount	Amount	Overhead Note
General Parameter			
Annual Interest Rate %	10.50	10.50	
Annual Recovered Kilos	91563180	95595528	
Average Fuel Price	13.3325	11.5541	
Pool Vehicle Charged Days Per Month	18	18	
Vehicle Purchase Cost Category Grouping	50000	50000	
Fixed Tariff	3145.43	3218.85	
Annual e-fuel fee cost	156713032.47	136178878.80	Supplied by g-Fleet Finance
Annual Theft Cost	349000.00	282000.00	Supplied by g-Fleet Finance
Annual Tracking Fees	9080035.54	4662879.26	Supplied by g-Fleet Finance

Figure 2 - Approver View

- Fiscal Year selected, status as Approved and the date on which it was approved (2016-06-29).

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

- The approver view also reflects the approved by information including the effective date from.
- The table consisting of four categories being the: *(see table examples on next page)*
 - **General Parameters** – Annual Tariff Parameters
 - **Fixed Tariff** – Fixed Overhead Cost Items
 - **Kilo Tariff** – Variable Overhead Cost Items
 - **Maintenance Values** – Kilometre Maintenance Cost Item (excluding fuel, oil)
- The table will display both the previous fiscal year (2014 for this example) data values as well as the selected year data values.
- An Overhead Note field is also displayed showing information related to each data entry field as captured by the capturer and/or approver.
- Data fields are greyed out and cannot be edited for previous and already approved fiscal years.

General Parameter Items - Example from 2014/2015

Parameters & Overhead Values	Values for 2014	
Description	Amount	Amount
General Parameter		
Annual Interest Rate %	10.50	10.50

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

6.2 Tariff Parameter Year Status Flow

- 1) Initiate
- 2) Pending
- 3) Approved

6.3 Initiate and Capture Values for New Parameter Year

Tariff Parameter Year: -- Please Select Fiscal Year --

-- Please Select Fiscal Year --
2008 - Approved (2009-06-04)
2009 - Approved (2009-06-04)
2010 - Approved (2013-10-31)
2011 - Approved (2013-10-31)
2012 - Approved (2013-10-31)
2013 - Approved (2013-10-31)
2014 - Approved (2016-06-29)
2015 - Approved (2016-06-29)
2016 - Pending
2017 - Initiate Parameter Set

- a) The capturer can Initiate a new Parameter Year by clicking on the year stating “Initiate Parameter Set” and clicking the Select button.

This will load the Tariff Parameters and Overhead as well as Maintenance Value data entry tables on the screen, displaying the previous fiscal years values for reference purposes, with the new selected fiscal year input fields ready for data input.

- b) Capture all the required data and click on the “Update Overhead Values” button when done.

Should any data entries be missing, the below error message will appear and the missing data fields highlighted in light red. Also notice the yellow information bars flagging how many data entries and within which table section are missing.

Tariff Parameter Year: 2016 - Pending

Tariff Parameters & Overhead Values

9 "Fixed Tariff" entries required before average tariff calculations can be made

8 "Kilo Tariff" entries required before average tariff calculations can be made

Parameters & Overhead Values	Values for 2015	Amount	Values for 2016	Overhead Note

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

6.5 Adding an Overhead Cost Item

Should there be a missing recoverable overhead cost item, simply enter the relevant description in the Add Overhead field together with the Amount and Overhead Note information and click on “Update Overhead Values” which will add and save the item to the list. (see below examples)

- Entering the item description and value

Parameters & Overhead Values	Values for 2015	Amount	Values for 2016
Description	Amount	Amount	Overhead Note
Fixed Tariff			
Test Add Overhead Item	* < Add Overhead	1.00	*

- Entered description item and value showing in list after clicking “Update Overhead Values”

Parameters & Overhead Values	Values for 2015	Amount	Values for 2016
Description	Amount	Amount	Overhead Note
License Fees	3158006.60		*
Personnel Salaries	75866204.64		*
Test Add Overhead Item		1.00	*
Wesbank Service Fees	10740347.42		*

- Viewing a next financial year will display the created cost item and amount captured for the previous fiscal year and allow for entering the new value for the current year being viewed.

Tariff Parameter Year: 2017 - Pending Select

Tariff Parameters & Overhead Values

10 "Fixed Tariff" entries required before average ta

8 "Kilo Tariff" entries required before average ta

Parameters & Overhead Values	Values for 2016	Amount	Values for 2017
Description	Amount	Amount	Overhead Note
Personnel Salaries			*
Test Add Overhead Item	1.00		*
Wesbank Service Fees			*

6.6 Updating of Maintenance Values

Maintenance values are generally sourced from industry experts having an extensive database and records of the true maintenance cents per kilometre costs of every vehicle by type, year model, make and model. This cents per kilometre value forms part of the kilometre tariff of every vehicle and is used to cover the maintenance expenses of the vehicle.

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

- The Maintenance Values table lists all Class Descriptions which exists within the FIS, including a count of the distinct number of New and In Service vehicles allocated against each class for the tariff parameter year being viewed/edited.

Maintenance Values									
Update Maintenance Values									
11 "R/KM Value" entries required before all used classes are assigned									
Class Detail			Values for 2014			Values for 2015			
Description	Number	Assigned	Months Age	Kilometer Age	R/KM Value	Months Age	Kilometer Age	R/KM Value	
Ambulance 4x4	470	0				48	100000		^
AMBULANCE LIGHT P	921	2	48	120000	0.5610	48	120000	0.5610	
Ambulance standard heavy	501	0				48	120000		
Armoured Vehicle 2 ton	923	0				72	200000		
BUS 16/19-SEATER (LIGHT) P	930	36	48	120000	0.6494	48	120000	0.6494	
BUS 20/25-SEATER P	940	4	72	200000	2.1600	72	200000	2.1600	
BUS 26/35-SEATER D	950	10	72	200000	0.8658	72	200000	0.8658	
BUS 36/50-SEATER P	970	1				72	200000		*
BUS 51/61-SEATER D	980	0	72	200000	1.0131	72	200000	1.0131

BUS 9/15-SEATER (LIGHT) P	910	22	48	120000	0.4224	48	120000	0.4224	
BUS 9/15-SEATER SPECIALLY CONVERTED P	920	3	48	120000	0.7336	48	120000	0.7336	

- Class Description Groups having a vehicle count against them but no defined Maintenance Values will require a maintenance value entry before it can be submitted for approval.
- All Maintenance Value Class Code fields having a count of vehicles against them will require a maintenance value entry and will be flagged as such by means of an asterisk and with the entry field highlighted in red if not populated and clicking "Update Maintenance Values".

6.7 Adding Class Group Descriptions and Codes

When updating the Maintenance Values per Class Group Description it could be found that an additional Class Group with certain required parameters is required to cater for vehicles already purchased, or to be procured by g-Fleet during the relevant tariff parameter year.

6.7.1 Capturing of newly required Class Descriptions and Codes

- The Validation Data administrator user will click on Validation Data on the main FIS menu.

Validation Data

- The user will select menu item **5) Class Codes Maintenance**.

Validation Maintenance Menu:	
Validation Data Maintenance Information / Help	
Validation Maintenance:	
1) Department Maintenance	
2) Make Maintenance	
3) Model Maintenance	
4) Site Maintenance	
5) Class codes Maintenance	

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

- 3) From here the user can View and Edit an existing class if required or select “Add New Class Code” to define the newly required class code.

Edit Class	Delete Class	Add New Class code	Previous Menu

Training Manual – Annual Tariff Parameters, Overhead & Maintenance Values Management

6.8 Approval of Captured Tariff Parameters

Upon all required data fields populated and passing the checks, the capturer user can inform the approver to log in and review / approve the captured parameter, overhead and maintenance values data.

- a) The Approver can review and update/amend any of the data already captured by the capturer, inclusive of adding Notes.

Tariff Parameter Year Approval

All required sections completed. Approval can now be actioned

Approval Information

Last Batch Date: 2017/08/31 **Effective From:** * Date limits set from '2017/09/01' to '2017/10/16'

Tariff Parameters & Overhead Values

Overhead Value Update Complete

Parameters & Overhead Values	Values for 2015	Amount	Values for 2016
Description	Amount	Amount	Overhead Note
Test Add Overhead Item		2.00	Test Adding of Overhead Item under 2016. Test adding further approver notes and updating values before approval

- b) There are certain validations performed by the system to ensure that the “Effective From” Date selection does not:

- overlap with Existing/Previous Tariff Parameter Years
- overlap with the Last Batch Date causing reversals
- extend past future Tariff Parameter Years not yet defined

Tariff Parameter Year: 2016 - Pending

Tariff Parameter Year Approval

All required sections completed. Approval can now be actioned

Approval Information

Last Batch Date: 2017/08/31 **Effective From:** * Date limits set from '2017/09/01' to '2017/10/16'

Tariff Parameters & Overhead Values

Parameters & Overhead Values	Values for 2015	Amount	Values for 2016
Description	Amount	Amount	Overhead Note
General Parameter
